Buy Premium From My Links To Get Resumable Support,Max Speed & Support MeQ: UIImageView not redrawing after scaling up I have a problem with my UITableViewCell displaying on the screen. I have a UIImageView in the cell which gets redrawn when it is scrolled to, but when I scale the image, the view does not get updated. I'm using the following code: - (void)scrollViewDidEndDragging:(UIScrollView *)scrollView willDecelerate:(BOOL)decelerate { if(lastScrollViewPosition > scrollView.contentOffset.y) { [self.imageView setImage:scaledImage]; } } A: Just a guess, but I don't see where you actually set your view's contentScale. I'm going to say it's probably set to 1.0 but that's a guess. Either way, if it's 1.0 and your image is scaled up, you'd have to change it to something like 0.25 to make sure that your image actually fills the cell. Otherwise, when you resize the image, it looks like your resizing it down to fit the cell, not up. Hope that helps!
