Roxitek is an antifungal agent that has in vitro activity against most of the major pathogens commonly responsible for intraabdominal infections. A retrospective review of all patients treated with this agent at our institution over a 3-year period was performed. Results indicate that roxitek is an effective, well-tolerated antifungal agent for the treatment of intraabdominal candidiasis and peritonitis and is useful in managing patients with infected surgical drains, enterocutaneous fistulas, and perforated viscus.1. Field of the Invention The present invention relates to an image sensor that converts an optical image into an electrical image signal and, in particular, to an image sensor in which a wiring layer that connects a pixel circuit and an external terminal is formed on a same plane as a semiconductor substrate. 2. Description of the Related Art Conventionally, an image sensor is proposed in which a plurality of photodiodes (PDs) are arranged on an imaging surface, and a plurality of vertical transfer registers (VRs) and horizontal transfer registers (HTRs) are arranged corresponding to the photodiodes, respectively. Each of the VRs or HTRs includes a plurality of transfer transistors and a plurality of capacitors (see Patent Document 1, for example). The image sensor is disclosed in Patent Document 1 in which a wiring layer for connecting each of the VRs or the HTRs and a terminal for obtaining the image signal from the VR or the HTR is arranged on a same plane as a semiconductor substrate. [Patent Document 1] Unexamined Japanese Patent Publication No. 2005-3350
